

# 公告(announcement)

有關夏季宿舍冷氣卡扣款金額增加問題，廠商回覆如下：  
各宿舍冷氣卡扣款，會隨著天氣溫度越高(熱)，扣款金額會增多，若又逢高樓層及向陽之寢室，室內溫度亦會增高，若將遙控器溫度調低，相對增加冷氣機壓縮機運轉，扣款金額即會增加。建議同學遙控器設定 23-26 度，搭配電風扇使用，可降低室內溫度，達到省電(錢)效果。

The air-conditioning card deduction for each dormitory will increase as the weather gets hotter. If the room is on a high floor or directly exposed to the sunlight, the indoor temperature will also increase. In this situation, when turning the temperature of the remote control lower, the compressor of the air conditioner will increase its running rate, leading to more deduction amount eventually. Therefore, it is recommended that students set the remote control to 23-26 degrees, and use it with an electric fan to reduce the indoor temperature, as to achieve the effect of saving electricity, thanks!
